

1

Prepare your image or artwork.
Print and cut your image using **solvent** or **eco-solvent** inks only (a THT profile is recommended)

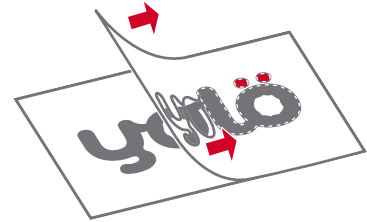

2

Leave the image for up to 6 hours to allow the ink to dry (time is dependent on ink and ambient conditions)

3

Weed away the unwanted film (a weeding tool may help)

4

Prepare the heat press at **165°C / 330°F**

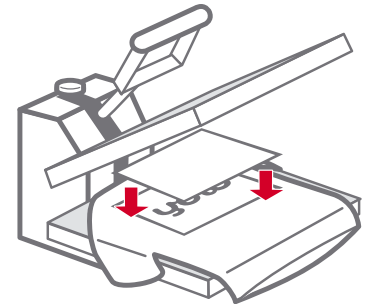

5

Using transfer mask (FlockTape recommended), place image face up on substrate

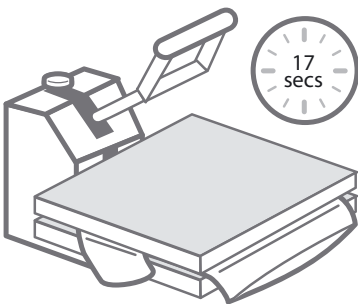

6

Cover with a Teflon or silicone sheet

7

Apply **medium** pressure for **17 seconds**

8

Peel when warm*

24hrs before washing

*After approximately 10 seconds

yolo tip

Repress for 10 seconds with a Teflon or silicone sheet to set the ink and improve image durability

wash and care instructions

Machine wash separately

Dry at low heat setting

Do not bleach or directly iron image
